

Software Requirements Specification (SRS)

ResellerHub AI – AI-Powered Reseller & Dropshipping Management Platform Name: Sabir Hossain

Roll: 251035012

1. Introduction

The purpose of this project is to develop ResellerHub AI, an AI-powered reseller and dropshipping management platform that helps businesses manage resellers, products, orders, commissions, analytics, and AI-driven business insights efficiently. **Scope**

- Reseller Management
- Product & Inventory Management
- Order Management
- Commission Management
- Analytics Dashboard
- AI Sales Forecasting
- AI Product Recommendation
- AI Business Assistant
- Report Generation

2. Users of the System

Admin

- Manage resellers
- Manage products
- Manage inventory
- Monitor sales
- Generate reports

Reseller

- Browse products
- Place orders
- Track earnings
- View recommendations
- Access AI insights

3. Functional Requirements

- FR-01 Login System – Users can log in securely using email and password.
- FR-02 Reseller Management – Admin can approve, update, and monitor resellers.
- FR-03 Product Management – Admin can add, update, delete, and manage products.
- FR-04 Inventory Management – Track stock and product availability.
- FR-05 Order Management – Resellers can place and track orders.
- FR-06 Commission Management – Automatic commission calculation and tracking.
- FR-07 Analytics Dashboard – Display sales, revenue, and reseller performance metrics.
- FR-08 AI Sales Forecasting – Predict future sales using historical data.
- FR-09 AI Product Recommendation – Suggest trending and suitable products.
- FR-10 AI Business Assistant – Provide AI-generated business insights.

FR-11 Report Generation – Generate sales, profit, and commission reports.

4. Non-Functional Requirements

Performance

System should respond within 3 seconds.

Security

JWT Authentication and role-based access control.

Reliability

System should ensure high availability and data integrity.

Usability

Simple and responsive user interface.

Scalability

Support growing reseller networks and product catalogs.

5. Use Cases

Reseller

- Login
- Browse Products
- Place Orders
- View Earnings
- Receive Recommendations

Admin

- Login
- Manage Resellers
- Manage Products
- Manage Inventory
- Monitor Sales
- Generate Reports

6. Future Scope

- Mobile Application
- Payment Gateway Integration
- WhatsApp Notifications
- Courier API Integration
- Multi-Vendor Marketplace
- Advanced BI Dashboard
- Real-Time Notifications

7. Conclusion

ResellerHub AI will automate reseller and dropshipping operations through modern web technologies and artificial intelligence. The platform will improve efficiency, reduce manual work, provide intelligent insights, and support business growth through data-driven decision making.
